

DESIGNS BROUGHT TO LIGHT

Inspire your customers with unique design concepts. Allow them to imagine the possibilities projects will have on a city, a building, or a space. LightWild delivers the Essential Lighting Tools™ to bring a specifier's innovations and creative thoughts to light.

Our solid state lighting products are built for diverse projects such as arena and building facades, hospitality, retail, health care, and commercial offices worldwide. LightWild's specifier culture is founded on service to architects and light designers meeting architectural, electrical, and mechanical engineering needs from design through installation to ensure every project's success.

LightWild is committed to sustainable developments by offering environmentally friendly products that consume low energy, generate virtually no heat, and can be utilized in a variety of long-life, low-maintenance lighting applications — even for the most intense environments.

Go ahead, dream big!
